FlowForma®
Empowering Process Automation

YOUR COMPARATIVE GUIDE TO:
FlowForma Process Automation vs GoFormz

FlowForma Process Automation exists to empower people to successfully automate processes in-house, without writing code. So, your business can digitalize at speed and focus on what it does best.

This comparison guide is based on industry research and customer insights, it will help you understand the differing product features and more importantly the pricing structures and integration capabilities.

Please note hidden costs for GoFormz regarding external forms, storage, and API use.

FlowForma® Empowering Process Automation	VS	goformz
An All-in-1 Digital Process Automation Tool		**Mobile Forms with Simple Workflow**

Product Features

FlowForma	GoFormz
• An All-in-1 tool for forms, workflow & document generation. • Powerful workflow engine. • A tool for businesspeople to automate simple to complex processes. • Unlimited document generation. • Enables external people to input to internal workflows. • 5 star onboarding & support. • Award-winning user interface. ✓	• Mobile forms. • Basic workflows. • Formulas are complicated for building forms. • No validation on data input (which means that data may need re-keyed/data is touched twice). • Lack of visibility on where forms go once completed (with FlowForma Process Automation you have visibility of who managed the subsequent steps). • Limited support documentation.

Forms Cost

FlowForma	GoFormz
• **With FlowForma Process Automation there is no additional charge for external forms.** • No hidden costs means easier budgeting and better value for money. ✓	• GoFormz charges per external form, in addition to internal user costs. • **Each external form costs between 75 cents and 45 cents (reducing in value as volume increases).** • **For example, a project with 10,000 forms rising to 200,000 across multiple projects, would incur a $7,500 premium rising to $90,000.**

Integration with Procore & SharePoint

FlowForma	GoFormz
• FlowForma Process Automation stores data & documents in your SharePoint environment, with **comprehensive mapping of form data into multiple areas of Procore.** • FlowForma Process Automation's integration with SharePoint allows you to easily manage multiple projects. Automatically create secure instances per project and copy form definitions between projects to ensure procedure standardization. • Simply tailor the forms to project-specific requirements. You have the option to delegate responsibility for maintaining the forms to project team members, with all changes being monitored and approved centrally. ✓	• GoFormz data lives in the GoFormz Cloud. Integration with Procore is **unlikely to allow full mapping of data** from GoFormz into Procore.

Form Attachments

FlowForma	GoFormz
• **FlowForma Process Automation has no attachment restrictions**, all data & attachments are stored in the client's SharePoint Online environment. ✓	• GoFormz limits features to contain cloud resource costs. For example, **GoFormz only allows a maximum of 10 attachments.**

Storage Capacity

FlowForma	GoFormz
• **FlowForma Process Automation uses your Microsoft 365 tenancy to store data.** ✓	• **The maximum storage amount for a Service is set at 5.0 GB.** GoFormz storage fees are $500 per month for 5 GB of additional storage.

Common Use Cases

FlowForma	GoFormz
• FlowForma Process Automation is designed for **seamless digitalization of simple to complex processes, with no limitations on the number of steps.** It's used to digitalize processes across all departments such as HR, Finance, Compliance, Health & Safety, Engineering, Quality etc. ✓	• GoFormz is used for simple one-step processes.
